To whom it may concern,

Please be advised that the Plast-O-Matic GGM Gauge Guard Series was officially superseded by Series GGS in 2009.

Series GGS provides the same options, ratings, reliability, longevity, and performance as Series GGM. It has a larger volume upper housing featuring a non-breakable, solid hex stainless steel (not wetted) gauge fitting. Width dimension, fit, fill and installation instructions, and function are unchanged.

This statement is provided at <https://plastomatic.com/technical-article/gauge-guards-series-ggs-ggse/> under the heading "Information for Legacy GGM Users" originally published in 2009.
